UNITED STATES POSTAL SERVICE
6060 PRIMACY PKWY STE 201
MEMPHIS TN 38188-0001

Overview

The Official National Zone Charts are produced by the United States Postal Service (USPS) using the geological survey files of established latitude and longitude coordinates. These coordinates determine the distance between originating and destinating ZIP Code pairings. Zone charts identify the appropriate distance code assigned to all originating and destinating ZIP Code pairings in the nation. These distance codes, or zones, are designated as “local” and “1 through 8.” The zone chart postage rate is based on mailpiece weight and the distance the mailpiece is being sent using these zone assignments. Zone charts create a matrix of originating and destinating ZIP Codes and identify the correct zone for the configuration.

The Zone Chart Program on Diskette was designed for customers that do not maintain a programming staff and for postal personnel in the field. This program operates on any DOS, Windows or OS/2 computer environment. This product is copyrighted and any unauthorized reproduction is prohibited. A license agreement is attached for your convenience.

***Note:** The menus on the following pages are examples of what appears on your screen.*

Main Menu

The main menu consists of six function keys and the <Esc> key. The program will operate with or without the use of the mouse. Each screen has an area at the top left displaying the word ESC. By pressing <Esc> or using the mouse, the user can return to the main menu or terminate the program.

<F1> Get a Zone

This function enables the user to obtain the appropriate distance code assigned to each originating and destinating ZIP Code pairing for each ZIP Code in the nation.

1. To obtain a zone, press <F1>.
2. Enter the originating 3-digit ZIP Code.
3. Enter the destinating 3-digit ZIP Code. The proper zone assigned to the ZIP Code pairing appears.

Note: *If the zone is eligible for an intra-BMC rate, a message appears on the screen.*

PRESS ESC TO RETURN TO MAIN MENU

<F2> Display a Zone Chart

This function enables the user to view a zone chart. After choosing this function, the user must enter the originating 3-digit requested. The user then selects choice A or B. Choice A displays all the zones assigned to the zone chart. Choice B displays the 3-digits that qualify for the Intra-BMC rate.

1. To view a zone chart, press <F2>.
2. Enter the originating 3-digit requested.
3. Enter either **A** or **B**. The program displays the 3-digit zone chart requested.
4. Press <Esc> to return to the main menu.

<F3> Print a Zone Chart

This function enables the user to print a 3-digit zone chart. The instructions are similar to those for displaying a zone chart. Once the user enters the origin 3-digit, the user will then enter **A** or **B**.

1. To print a zone chart, press <F3>.
2. Enter the origin 3-digit requested.
3. Enter either **A** or **B**. Once you enter your preference, printing begins.
4. Select another 3-digit zone chart or press <Esc> to return to the main menu.
